DETAILED ACTION

Specification

1. The substitute specification filed 24 November 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kutz et al (5,299,067).

The limitations in claim 2 are shown in Kutz et al Figs. 1,2,4,6, column 3, line 52 through column 6, line 12. Kutz et al discloses a device 26 for use with optical instruments 20 comprising a ring 30 adapted and configured for receiving a corrective lens 32 within an inner diameter thereof, a corrective lens 32 disposed with the inner diameter of the ring 30; and the securing/mounting portion 34 having a compressible, resilient rubberized foam layer for attaching the ring to a lens of an optical instrument whereby a visually impaired individual can use the optical instrument without the need for glasses.

Regarding claims 3,5,6, the mounting portion 34 having a compressible, resilient rubberized foam layer is inherently including the meaning of a clamping assembly for attaching the ring to the optical instrument.

Art Unit: 2873

Regarding claims 4,7, Kutz et al discloses the mounting portion 34 includes a series of threads 44 machined on an exterior surface thereof which correspond to threads 40 formed on the ring.
